SUMMARY

Senior Frontend Engineer with 6+ years in Vue and TypeScript. I own real-time, multi-brand frontends from architecture and design system through ship and metrics. Recent work: one Vue 3 codebase serving 3 live brands, JS bundle cut about 30%, Lighthouse load ~2.0s to ~1.5s, gameplay UI holding 60/30 FPS. I use AI for research, scaffolding, and refactors; architecture and review stay mine. Open to Senior Frontend and UI Platform roles. Remote.

EXPERIENCE

Senior Frontend Developer
Looptain.Limited | Remote | May 2024 - Present

- Built and maintain core real-time surfaces (crate opening, roulette, case battles, miner) with low-latency WebSocket game state and wallet sync for hundreds of concurrent players.
- Own the V2 UI platform: 50+ reusable components, Storybook, Figma design tokens; one codebase serving 3 production brands.
- Cut JS bundle ~30% (code splitting, dependencies, build config) and Lighthouse load ~2.0s to ~1.5s (lazy routes, asset delivery, render strategy).
- Engineered animation pipelines that hold 60/30 FPS on crate and gameplay UI (render and DOM budgets, mobile and desktop).
- Designed wallet and transaction UI synced with backend over REST and WebSockets.
- Owned frontend PostHog: SDK, identify, feature flags, experiments, session replay, surveys; offer-modal targeting with backend and product.
- Code review and architecture guidance in a 6-engineer team; Vitest/Jest and Playwright on gameplay and money paths.

Middle+ Frontend Developer
Insider | Turkiye, Remote | Sep 2021 - Jul 2022

- Shipped complex Vue.js and vanilla JavaScript UI integrated with PHP and Go APIs for a customer-engagement platform used by global enterprise clients.
- Designed and published internal NPM packages reused across multiple frontend projects.
- Contributed to frontend architecture and component standards with backend and product.

Middle Frontend Developer
Unicode | Moscow, Remote | Dec 2020 - Dec 2021

- Built and maintained the Vue.js editor and site-rendering UI for a visual website constructor: layout, blocks, preview, and publish.
- Integrated frontend with Python APIs for save/load, assets, and publish.
- Improved desktop and mobile performance of the constructor and the generated sites.
- Automated tests with Jest on critical editor and publish paths.
- Mentored junior developers and reviewed PRs with design and backend.

Junior+ / Pre-Middle Frontend Developer
SEDEMO Trading and Investments | Poland | Dec 2019 - Jan 2021

- Built responsive Vue.js and Nuxt.js UI for crate/case flows and related game surfaces.
- Integrated frontend with PHP APIs for catalog, open/result, and user state.
- Improved performance and layout across desktop and mobile in production.

SKILLS

Vue 3, Vue.js, Nuxt.js, TypeScript, JavaScript, Pinia, TanStack Query, i18n, PWA

Design systems, Storybook, Figma tokens, Tailwind CSS, SCSS, component architecture

WebSockets, REST, PostHog, feature flags, wallet / payments UI

Vitest, Jest, Playwright, Vite, Webpack, GSAP

AI workflow: research, scaffolding, and refactors in the loop; architecture and review stay mine
